## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-31 and 36-41 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner agrees with the applicant in regards to the new claims and their allowability.
3. The claims are drawn to a plurality of content servers that work together in order to distribute and fulfill requests from multiple end-user terminals. In particular, the servers share data about various requests so that, if a second request provided to a second server is similar to the first request provided to the first server, the second server may base its response on data related to the first request. Further, the servers are load balanced to distribute the processing burden.
4. Of the art that comes similar to the above, most teach toward some form of centralized planning system, such as a shared database, or towards a disk striping and/or scheduling system. The claims as drawn teach away from the known art. These claims are novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They disclose background on ITV, load balancing, and server discussion techniques.
